Marcos Perez

Full Stack Developer

I am a Fullstack developer whose most experience is in Javascript/Typescript technologies both backend and frontend. I consider myself a proactive person, who never stop to learn and I am hungry for new challenges. Even though my main skills are developer, I also know about CI/CD (Gitlab), docker and basic arquitectonic patterns.

I have been a programmer since I was 15 years olds but I have done it professionally for around 7 years. I think it is a wonderful world where you never stop to amaze me. I want to be part to the best team where I can share my expertises and get too

My Last Work was to implement a platform to assign and track debts. The app was implemented in Next.js (React.js). Also I worked on a mobile project with Ionic/Angular and an API build on Loopback (Node.js).

PROFESSIONAL EXPERIENCE

Empresa Provincial de Energía (EPE)
Full Stack Developer | December 2019 – Currently
- Implementation web tracking with Next.js (Next.js – React.js)
- Management issues, deploys and configurations of projects
